Petition to the Park Township Board of Trustees

We, the undersigned residents of Park Township, urge the Board of Trustees to do the right thing: find a way to allow *only* those short-term rentals that were operating prior to the March 2024 ban to continue.

For decades, township zoning administrators, code enforcement officers, and officials had consistently told property owners that no permit was required for short-term rentals, and that there were no regulations or restrictions regarding rentals at all. People trusted the word of the township and built their lives around it.

Then the township changed the rules in the middle of the game, eroding the trust that good governance depends on. The township has spent over $338,000 trying to shut down the small number of remaining rentals that were in use prior to the ban. Let's put this costly and divisive dispute behind us. Settle this matter with fairness and move on.
